EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel E. Bair (616-742-3500) on 09/27/07.

2. The application has been amended as follows:

In the drawings (filed on 7/24/06):

In Figure 35, delete item: "206" and insert: -- 706 --.

In the Claims (filed on 5/10/07):

In claims 13-20, at the beginning of line 1, before the word "method" delete "A" and insert: -- The --.

In the Specification (filed on 7/31/03):

At the end of the paragraph of section [0046], insert:

-- Fig. 35 is a cross sectional view of a jig according to the invention.

Fig. 36 is a plan view of a plate adapted to be placed in the jig of Fig. 35.

Fig. 37 is a cross sectional view of the jig of Fig. 35 with stacked plates and a shaft pressed into the plate stack. --.

Art Unit: 3729

Notation: Any subject matter with respect to drawings or amended specification regarding Figures 35-36 are only entered in order to clarify the current claimed invention, especially with respect to the "guide" limitation.

In the Abstract (filed on 7/31/03):

Delete the entire paragraph and insert:

-- A method of forming a winding core for an electric motor includes providing a hollow jig having a guide, sliding plates, each having a guide and a central opening, onto the guide in the jig where the guides mate, and pressing a shaft into the central opening of the plates. The plates are then compressed to form a lamination and secured in compression by a lock nut on the shaft. --

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Upon reconsideration, the prior art, Kanno (US 5,255,425) does not teach nor suggest a guide in the plates and a corresponding guide in the jig, where the two guides are shaped to mate with each other and it would not be obvious to one of ordinary skill in the art to consider the edge fit (Office Action on 2/03/06, page 5, Fig. 2A) of Kanno as of having a special purpose of a guide but rather as fit-sized or stamped core.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
